SUMMARY

Full Stack Software Engineer with hands-on production experience in Spring Boot (Kotlin/Java), Angular, and React, building backend microservices and customer-facing dashboards for a remote-first VR/AI platform. Strong foundation in REST API design, JPA/Hibernate, and clean, maintainable code. Currently completing a B.Sc. in Computer Science & Engineering.

EDUCATION

Dhaka International University

Bachelor of Science in Computer Science and Engineering

Dhaka, Bangladesh

Expected: August 2026

TECHNICAL SKILLS

Languages: Java, Kotlin, JavaScript, TypeScript, C, SQL

Technologies & Frameworks: Spring Boot, REST API, JPA, Hibernate, Angular, React

Databases & Tools: MySQL, MariaDB, JUnit, Mockito, Git/GitHub, Docker, Azure Log Analytics

EXPERIENCE

Full Stack Software Engineer

Avanto VR Solution GmbH

Aug 2024 – Present

Remote

- Developing and maintaining scalable backend services using Spring Boot
- Designed and implemented the ESYSYNC dashboard for 3,000+ customers, improving usability and overall user experience
- Implemented multiple background jobs using Spring Scheduler for automation and system efficiency
- Built customer routing and real-time location heartbeat features for enhanced tracking and system monitoring
- Developed AI-powered interior design feature FEELESTATE across both frontend and backend systems
- Contributed to frontend development using Angular, improving UI responsiveness and user experience

PROJECTS

ShopSpot E-commerce (Spring Boot / React)

ShopSpot is a full-stack AI-powered e-commerce application featuring product management, shopping cart, secure checkout, order management, and JWT-based authentication. Built with React, Spring Boot, and MySQL, the platform also integrates intelligent AI-driven features to enhance the shopping experience, including:

- AI Chatbot for customer assistance and product-related queries.
- AI-powered Suggested Collections based on user browsing behavior.
- Personalized AI Product Recommendations using user wishlist, search history, and purchase history.
- AI Image Search that allows users to upload an image and find visually similar products.

Global Exception Handling System (Spring Boot)

Centralized exception handling in a Spring Boot application using `@ControllerAdvice`. Features custom exception classes, structured error responses, and standardized error management for improved API consistency.
