YOUNUS ALI NAHID

Full Stack Software Engineer | Java · Spring Boot · React · Next.js

eng.yanahid@gmail.com | +880 1878 772 283 | Dhaka, Bangladesh
Portfolio | GitHub | LinkedIn | LeetCode (100+ solved)

SUMMARY

Full Stack Software Engineer with **2+ years of production experience** building Java/Kotlin Spring Boot microservices and REST APIs, alongside modern frontends in React, Next.js and Angular. Delivered **15+ REST APIs serving 3,000+ customers**, led a monolith-to-microservices migration, and cut media-upload latency by **80%** with AWS S3. Experienced in building AI-powered product features end to end, with a strong foundation in data structures and algorithms.

TECHNICAL SKILLS

Languages	Java, Kotlin, TypeScript, JavaScript, SQL, PHP, C
Backend	Spring Boot, Spring MVC, REST APIs, Microservices, JPA/Hibernate, Flyway, Spring Scheduler
Frontend	React, Next.js (App Router & API Routes), Angular, Tailwind CSS, Zustand, HTML5, CSS3
Databases & Cloud	MySQL, MariaDB, AWS S3, Azure, Docker
Security & AI	JWT, Session Auth, Role-Based Access Control, LLM API integration (Groq, OpenRouter)
Testing & Tools	JUnit 5, Mockito, Postman, Git/GitHub, IntelliJ IDEA

EXPERIENCE

Full Stack Software Engineer **Aug 2024 – Present**

Avanto VR Solution GmbH *Remote*

- Owned end-to-end development of a new microservice with **15+ REST APIs** powering mobile apps for **3,000+ customers**.
- Decomposed a legacy monolith into microservices, improving scalability, fault isolation and reliability.
- Cut media-upload latency by **80%** (from ~1 min to 5–10 sec) by migrating file storage from local disk to **AWS S3**.
- Implemented zero-downtime database schema migrations with Flyway, JPA and Hibernate across production environments.
- Built the **ESYSYNC** dashboard in Angular for 3,000+ customers with real-time monitoring and an improved UI.
- Developed **FEELESTATE**, an AI-powered interior design feature, end to end across frontend UI and backend APIs.
- Engineered customer routing and real-time location heartbeat tracking; automated background jobs with Spring Scheduler.
- Collaborated with the team lead on REST API design and architecture in a fully remote, distributed team.

PROJECTS

ShopSpot E-commerce | *Spring Boot, React, MySQL, JWT, Docker* GitHub | Live Demo

- Full-stack AI-powered e-commerce platform with product catalog, cart, checkout, wishlist and inventory management.
- AI search, personalized recommendations, chatbot, review sentiment analysis and automated stock alerts.
- Secured APIs with JWT authentication, stateless sessions and role-based access control.

Alumni Association Management Platform | *Next.js, React, TypeScript, Tailwind CSS* GitHub | Live Demo

- Next.js App Router with a complete admin workflow: registration approval, notice CRUD and gallery management.
- REST API routes with server-side validation, cookie-based session auth and role-based route protection.
- Token-based QR code verification for alumni profiles without exposing internal record IDs.

ProLens Real Estate Platform | *React, TypeScript, Vite, Tailwind CSS* GitHub | Live Demo

- Searchable, filterable property listings with interactive map exploration (React-Leaflet).
- Property comparison and market-insight dashboards with Recharts and Zustand state; animations via Framer Motion.

Student Result Management System | *Java, Spring Boot, JPA, MySQL, JUnit* GitHub

- Relational schema and REST APIs with automated GPA calculation and duplicate/inconsistent grade validation.
- Unit and integration tests with JUnit 5 and Mockito; centralized error handling via @ControllerAdvice.

EDUCATION

Dhaka International University — B.Sc. in Computer Science and Engineering **August 2026**

PUBLICATION

PaniCord: An IoT-Based Emergency Alert System Using ESP32 for Real-Time Location Tracking Certificate

Accepted and presented at ECCT 2026 (International Conference), Dhaka International University.
