Younus Ali Nahid

Portfolio | GitHub | LeetCode (100+ Problems Solved) | +880 1878 772 283 | eng.yanahid@gmail.com

Summary

Full Stack Software Engineer with 2 years of production experience building scalable microservices and REST APIs using Java/Kotlin (Spring Boot), along with modern frontends using Angular/React. Experienced in developing end-to-end web applications, API integrations, and cloud-based solutions. Strong foundation in data structures and algorithms, with 100+ LeetCode problems solved.

Technical Skills

Languages: Java, Kotlin, JavaScript, C, SQL
Frameworks: Spring Boot, REST API, JPA, Hibernate, Spring Scheduler, Flyway, Microservices, Angular, React, Next.js, TypeScript
Database, Cloud and Tools: AWS (S3), MySQL, MariaDB, JUnit, Mockito, Git/GitHub, Docker, Azure

Experience

Full Stack Software Engineer *Aug 2024 -- Aug 2026*
Avanto VR Solution GmbH *Remote*

- Built a new microservice and developed 10+ REST APIs serving 3,000+ customers
- Collaborated with the team lead on REST API design and architecture
- Built services using MVC, Hibernate, and Flyway for zero-downtime migrations
- Converted a monolithic application into microservices for improved scalability and reliability
- Cut media upload latency from ~1 min to 5-10 sec via Amazon S3 migration (80% faster)
- Automated background jobs using Spring Scheduler
- Developed customer routing and real-time heartbeat tracking features
- Built the AI-powered interior design feature for FEELESTATE end-to-end
- Designed the ESYSYNC dashboard for 3,000+ customers

Projects

ShopSpot E-commerce | *Spring Boot, React* GitHub

- Built a complete full-stack e-commerce platform using Spring Boot and React
- Implemented AI-powered search, recommendations, and product discovery
- Added AI chatbot, review sentiment analysis, and stock analysis
- Secured APIs with JWT authentication and role-based access control
- Integrated wishlist, inventory alerts, and personalized recommendations

Student Result System GitHub

- Designed relational database schema and RESTful APIs
- Implemented automated semester result and GPA calculation
- Added validation for duplicate and inconsistent grades
- Wrote unit tests using JUnit and Mockito
- Implemented centralized exception handling

E-commerce Application GitHub

- Pagination, sorting, and filtering for catalog browsing
- JPA/Hibernate schema with request validation
- Centralized exception handling via @ControllerAdvice
- Custom exception classes for clear API error messages

Alumni Association Management Platform | *Next.js, React, TypeScript* GitHub | Live Demo

- Built a full-stack alumni association management platform using Next.js (App Router), React, and TypeScript
- Developed a responsive, modern UI styled with Tailwind CSS
- Structured the application with reusable React components and Next.js routing conventions

Education

Dhaka International University *Dhaka, Bangladesh*
Bachelor of Science in Computer Science and Engineering *August 2026*

Publications

PaniCord: IoT-Based Emergency Alert System (ESP32) View Certificate

- Accepted at ECCT 2026 (International Conference), Dhaka International University
